

Temperature-Controlled **VEHICLE INSERT SERIES**

Extend your delivery area and increase your profits by upfitting virtually any vehicle with the Vehicle Insert Series by Delivery Concepts.

TEMPERATURE SOLUTIONS:

Frozen

Refrigerated

Heated

Multi-temperature

DELIVERY CONCEPTS, INC.

800-654-1857 | info@deliveryconcepts.com | deliveryconcepts.com

With frozen, refrigerated, heated, and multi-temperature configurations, the **Vehicle Insert Series by Delivery Concepts** is a cost-effective solution for efficient transport of perishable cargo. Seamless construction, void-free insulation, and convection heating technology ensure consistent temperature without the use of dangerous propane gas or open flame.

Vehicle inserts are compatible with virtually any chassis, and can even be used in combination with Insulated Vehicle Conversions (IVCs) to add an interior holding oven to a refrigerated vehicle. All inserts meet local and state Board of Health temperature requirements.

Quick Facts

- Custom configurations to meet your exact business needs
- Transferable to virtually any chassis
- Frozen, refrigerated, heated, and multi-temperature configurations
- Seamless construction
- No voids in insulation
- Custom shelving available

Not quite right?

The Body Series by Delivery Concepts features lightweight, insulated fiberglass food transport bodies with optional frozen, refrigerated, heated, and/or ambient compartments.
